## PROFILE

Systems engineer with experience in designing and developing web applications, focusing on creating intuitive, efficient, and scalable solutions. I use modern technologies such as React, Next.js, and Vue, along with solid knowledge of SQL databases to design and manage robust data structures. My approach is oriented toward responsive design, continuous improvement, and collaboration in agile teams. I am seeking opportunities to apply my skills and contribute to innovative projects that drive technological development.

## EDUCATION

2020 - 2024

**INSTITUTO TECNOLÓGICO DE  
CULIACÁN**

Bachelor's in Computer Systems  
Engineering

## EXPERIENCIA

**MAY 2024 - OCTOBER 2024**

KAMI ELECTRONICS

**Front-end Developer Intern**

- Developed reusable TypeScript modules to optimize efficiency.
- Collaborated in an agile team following the SCRUM framework to meet weekly deliverables.
- Implemented REST APIs to improve real-time fleet management.

**2020 - 2024**

Instituto Tecnológico de Culiacán

**Student**

Worked on various academic projects where I gained experience using modern technologies.

During these projects, I developed logical and communication skills, utilized Agile/SCRUM methodologies, and worked in front-end development, database management, and interface design.
